EXPERIENCE

Amazon Web Services, Seattle, WA — *Front End Engineer*

July 2021 - Jan 2023

- Lead implementation and launch of new React based user experiences on the AWS Identity and Access Management Console, simultaneously monitoring the customer experience and quickly remediating incoming issues.
- Participated in on-call rotation every month for the IAM console, resolving customer and operational issues and presenting the weekly status to the broader Identity team.

Workiva, Ames, IA — *Software Engineer Intern*

May 2020 - August 2020

- Front-end development on Dart + React based web application, Wdesk.
- Developed an improved modal to manage XBRL profiles in Wdesk.
- Worked with Agile development methodologies. Participated in code review and wrote unit and functional tests.

NPR, Washington, D.C. — *Web Software Developer Intern*

May 2019 - August 2019

- Utilized a full stack (MongoDB, Express.js, Angular, Node.js) to develop an Audio Engineering discrepancy logger web application. I was the sole developer on this project.
- Used Docker to containerize the application for CI/CD.
- Gained experience with project management tools such as Jira and Confluence.

EDUCATION

Iowa State University, Ames, Iowa

— *Software Engineering, B.S.*

August 2017 - May 2021

· 3.01 GPA
